

REITEL LED
Workstation light

REITEL LED Workstation light – ensures bright moments!

Whether in laboratory, surgeries or in the office – the REITEL LED workstation light with elegant design, generates a pleasant homogeneous workplace illumination. Moreover, it has a remarkably high light efficiency!

By use of a dimmer the LED lighting system is infinitely adjustability in brightness and color temperature from warm white to cool white, enabling the user to store / recall up to three light settings. Cool light (approx. 6.500 K – similar to daylight) enhances

concentration and prevents fatigue. It clearly accentuates outlines and details, for example in testing stations and quality control. Warm light (approx. 3.000 K) generates well-being and reduces reflections on glossy parts. By redirecting light rays from more than 100.000 micro lenses uncomfortable brightness is avoided, achieving homogeneous light distribution. Shadows on working areas are basically nonexistent even when partial light obstruction occurs. Thus, common multi shadows in LED lighting are prevented.

The sleek aluminium design and high-quality synthetic parts combine functional industrial standards and appealing office design. The prism area is easy to clean due to its smooth surface.

The LED workstation light is available in two different sizes, for wall assembly or including an articulated arm with five adjusting screws for direct installation at the desk.

LED WORKSTATION LIGHT MINI Wall assembly set

LED WORKSTATION LIGHT COMFORT Wall assembly set

LED WORKSTATION LIGHT MINI – incl. adjustable arm Table installation set

LED WORKSTATION LIGHT COMFORT – incl. adjustable arm Table installation set

Technical Data – LED WORKSTATION LIGHT MINI	
Operating voltage / Power consumption	48 V / 24 W
Current consumption	0,5 A
Dimensions (h x w x d)	15 x 304 x 198 mm
Light color	white, adjustable
Angle of radiation	approx. 60°
Illumination 0,5 m	2.510 Lux
Illumination 1,0 m	664 Lux
Illumination 1,5 m	320 Lux
Housing material	aluminium

Set-Prices – LED WORKSTATION LIGHT MINI illu. see above	
wall assembly, Order-No. 19100000	510,- €
table installation, Order-No. 19101000	800,- €

Technical Data – LED WORKSTATION LIGHT COMFORT	
Operating voltage / Power consumption	48 V / 48 W
Current consumption	1,0 A
Dimensions (h x w x d)	15 x 564 x 198 mm
Light color	white, adjustable
Angle of radiation	approx. 60°
Illumination 0,5 m	4.650 Lux
Illumination 1,0 m	1322 Lux
Illumination 1,5 m	617 Lux
Housing material	aluminium

Set-Prices – LED WORKSTATION LIGHT COMFORT illu. see above	
wall assembly, Order-No. 19110000	710,- €
table installation, Order-No. 19111000	1.100,- €
